

## A CONVENIENT CARD PROGRAM

Tokens are becoming more and more common all over the world. Companies, products, industries, economies are setting up their own tokens and cryptocurrencies thus giving birth to a **full digital economy**.

Debit cards are the most widely used, XXth century technology of “electronic money”. As a result, we can find a whole business that connects cryptocurrencies with electronic money and allows to **spend them anywhere** where a debit card is accepted.

**Peer2krd** has been able to create a **Debit Card reload service** in just a few months, providing free cards to EU citizens with wide limits (up to 15.000 EUR on card when user verifies at the card provider website)

We are planning to go some steps further upcoming months by **creating our own white label card program**, integrating it into Pungo Wallet and offering anyone who wants to integrate our fiat gateway the possibility to provide this service to its users.

### FEATURES

1rst batch

sent and more coming soon

Reloadable

with Cryptocurrencies through an easy UI

Available

For UE legal residents
